

**REMARKS**

Reconsideration of this application as amended is respectfully requested.

The specification has been amended to clarify the present invention.

Claims 1-4, 11 and 13 have been amended.

Claims 1-14 were rejected under 35 U.S.C. 102(b) as being anticipated by Kawakami. Claim 1 has been amended to recite that the housing includes a first housing having an installation opening and a second housing element including a closure member for covering the installation opening, the closure member and the second housing forming a one-piece integral element with the second housing element, the closure member being openable to uncover the installation opening. Kawakami fails to disclose a closure member that forms a one-piece integral element with a housing element as claimed in claim 1 of the present invention. For this reason, this rejection of claim 1 should be withdrawn.

Claims 2-14 were rejected as claim 1 under 35 U.S.C. 102(b). Since claims 2-14 depend directly or indirectly from and contain all the limitations of claims 2-14 as amended, they are felt to overcome the obviousness rejection in the same manner as amended claim 1.

This amendment is believed to be fully responsive to the comments and suggestions of the Examiner and to place this application in condition for allowance. Favorable action is requested.

Respectfully submitted,

GEORG BLASCHKE
